

DO YOU KNOW THE POTENTIAL OF YOUR DOG?

Soňa Klikarová, Mushing
22× Mistryně ČR, 24× Mistryně Evropy,
9× Mistryně světa

Aptus Reconvalescent Dog and Aptus Nutrisal from Orion Pharma Animal Health are, among others, intended for support of sporting dogs. **Reconvalescent Dog** contains basic nutrients (amino-acids, fat, short and long acting sugar, vitamins, antioxidants) and **Nutrisal** is rehydrating and energy drink (sugar + electrolytes).

This is an ideal combination of drinking and feeding way for dogs undergoing physical activity.

Aptus® Nutrisal

Water soluble nutritional supplement intended for maintenance of water-electrolyte balance in organisms.

Nutrisal is energy drink, which also restores water-electrolyte balance in dogs and cats. Mixing the powder with water provides isotonic solution. Glucose supports absorption of sodium and water.

Aptus Reconvalescent Dog pasta and Aptus Nutrisal is ideal solution for dogs undergoing physical activity, who need high calorie and nutrition content in small amount of food with excellent digestibility.

Sona Klikarova – one of CZ famous mushers – attended last year World Championship in Quebec, Canada, with two dogs – Zoom and Zula. Zoom was the only dog, who joined all races. In total, Sona Klikarova was awarded by one 3rd place, one 4th place, and two 5th places. The disciplines were: relay, combination, bikejoring, skijoring. Zoom has passed 5 races during 6 days in the temperatures around -30 °C in the nights, and -20 °C in the days. Zoom's performance was growing every other race and he had not shown the signs of fatigue. He was fed by Reconvalescent and drunk by Nutrisal.

Nikol Hanacikova (champion in agility) has also two dogs. She was using combination of Reconvalescent Dog + Nutrisal before and during qualification to European Open in May 2009, and she succeeded. She says: „I was really pleased, how my dogs accepted Reconvalescent and especially, how fast they recovered after every race. I have never experienced such a fast reconvalescence and ability to enter next race . . .“

Aptus® Reconvalescent DOG pasta

Basically, veterinary nutrition supplement for dogs Aptus Reconvalescent Dog pasta is intended during inappetence, starvation, and especially for dogs in reconvalescence. Reconvalescent Dog provides necessary energy and nutrients in the form of fat, sugar and essential amino-acids. It contains also necessary vitamins and antioxidants.

Reconvalescent Dog is suitable for patients in convalescence period after trauma, surgery, for cancer patients. In general, the paste fits to all patients refusing food. Reconvalescent Dog is very good also for geriatric patients with chronic musculo-skeletal disorders and patients with hypothyreosis.

Components of this feed supplement suppress pain perception and accelerate wound healing. These contents also make oncological patients feeling more comfortable.

How to drink and feed the dog before and during the races?

1. Aptus Nutrisal

drink the dog 3 days before and during the activity, and 1 day after the activity with APTUS NUTRISAL. Dosage: 1 measuring spoon (attached) in 1L of water. Dog can drink up to 1L per 10kg in hot weather or physical activity

2. Aptus Reconvalescent DOG pasta

- a) lower the dose of common food three consecutive days before the races like this: 3rd day 60%, 2nd day 50%, the day before race 50%
- b) add Reconvalescent Dog since 3rd day before races to common food in normal dose per body weight
- c) during races, feed your dog with 50% dose of common food + normal dose of Reconvalescent Dog per body weight
- d) give 125% of common food + ½ dose of Reconvalescent Dog also 2 days after races.
